

COLBY COMMUNITY COLLEGE
DEPARTMENT OF NURSING

**PROGRAM GUIDE
NURSING PROGRAM**

A nursing career provides a wide variety of job opportunities. Nurses practice in various settings which include care of infants, children, adults, or the elderly.

Practical Nursing

Colby Community College offers a Certificate in Practical Nursing, offered at both Colby and Norton campuses. Successful completion of the Practical Nursing Program qualifies the student to be eligible to apply to write the licensure exam for practical nursing.

Associate Degree Nursing

Colby Community College offers an Associate in Applied Science Degree in Nursing. Successful completion of the Associate Degree Program qualifies the student to be eligible to apply to write the licensure exam for associate degree nursing.

CURRICULUM

The nursing curricula includes nursing and non-nursing courses which help develop well-rounded, competent nurses. Coursework includes classroom, laboratory, and clinical experiences. Supervised client care experiences occur in hospitals and long term care facilities with a number of observational experiences at additional facilities such as day care centers.

The nursing program is comprised of semester hours. 16 contact hours = 1 semester credit hour. Theory hour ratio is 1:1. Clinical / lab contact hours to credit hour ratio is 3:1. For example: A 1 credit hour of theory will generate 16 contact hours and 1 credit of clinical/ lab will generate 48 contact hours.
